PROFILE

Third-year Electronic Engineering student at the Hong Kong University of Science and Technology with hands-on experience in computer networking, systems programming, and circuit work. Currently building a user-space TCP implementation in C++ and contributing to open-source projects such as Kinto (Mozilla Services). Open to internships in software engineering, computer networking, and hardware, including circuit design.

EDUCATION

The Hong Kong University of Science and Technology Hong Kong

BEng in Electronic Engineering Sep 2024 - May 2028 (expected)

- Relevant coursework: Computer Networks (ELEC 3120).

OPEN SOURCE

- Oct 2026 - Kinto (Mozilla Services): fixed a months-long Read the Docs build failure caused by the removed pkg_resources API; verified with unit tests and a local docs build (PR #3803, merged).
- Oct 2026 - OffPDF (Rust/Tauri): authored the local-AI licensing matrix used in their runtime and model research, verifying licenses and primary sources for 11 candidates (PR #127, merged).
- Oct 2026 - React (react.dev): documented compiler syntax that prevents compilation inside try/catch, verified across 20+ compiled samples (PR #8697, in review).

TECHNICAL PROJECTS

FoggyTCP: A User-Space TCP Implementation Sep 2026 - Present

ELEC 3120 Computer Networks, course project · C++, Linux, Git, Vagrant, VirtualBox

- Developing a user-space TCP implementation in C++, covering sliding-window transmission, loss recovery, and congestion control.
- Configured an isolated Linux development environment with Vagrant and VirtualBox for building and testing the protocol.
- Using Git for version control and Linux development tools for building, testing, and debugging the implementation.

SKILLS

Programming: C, C++, Python

Networking: TCP/IP fundamentals, socket programming

Development tools: Linux, Git, GitHub pull requests, Vagrant, VirtualBox

AI-assisted development: Codex for prototyping and debugging

Hardware and laboratory: Arduino, circuit design, oscilloscope, MATLAB

Languages: Cantonese, English, Mandarin
